## • BRISC AA / BB Electro-permanent magnetic chuck for milling

### Features:

- Professional magnetic clamping solution provider with durable and water proof surface
- Unique design eliminate the remaining magnetism dramatically
- Revolutionary design creates higher clamping force
- High tolerance manufacturing creates the most stable and accurate clamping surface
- Two chucks can be combined to reach bigger size

## • CUA Control unit

### Features:

- Control unit has the current detecting system which can tell the success of magnetization
- Control unit has the PLC communication
- Control unit has the output signal enable function which can prevent machine tool from operating when the chuck is not magnetized
- Control unit has the input signal enable function which can prevent the chuck be demagnetized when machine is running
