

Specification

SKR-DZ019-00

6.5 inch servo motor wheel

Unilateral exit shaft, positive and negative rotation, speed can be adjusted. The servo motor wheel adopts brushless DC motor, which has low sound, no spark and long operation life; metal shell, with stronger bearing capacity and stability; wheel surface is made of TPU material, which is wear-resistant, noise reduction and shock-proof, safe and reliable; equipped with 1400 line high precision encoder, precise control.

Technical data

Rated voltage	DC24V
Rated power	160W
Rated torque	8N. m
Rated current	≤14A
Rated speed	200rpm
Maximum torque	15N. m
Maximum current	18A
Maximum speed	300rpm
Armature resistance	≤300m Ω
Insulation class	F
Insulation strength	AC3000V 20m Ω
Encoder wire count	1400
