

## Ordering Information

DTP - (1) - H(2)				
		(1) interface	(2) lens code	FOV
UART	UART 3.3V	04	4°	
485	RS-485 Modbus	08	7°	

\* DTP-UART-H04: UART interface, FOV=4°

\* DTP-485-H08: RS-485 interface Modbus protocol, FOV=7°

## Product Specifications

All of voltages refer to 3.3V, ambient temperature is 25°C unless otherwise note.

Parameter	min	Typ	Max	Unit			
Supply voltage	3.2	3.3	3.6	V			
Supply current	11	13		mA			
Filter type	F5.5 (LWP cut on 5.5μm)						
Object temperature range	-40		380	°C			
Operating temperature	-20		70	°C			
IR refresh rate		10		Hz			
Accuracy(*)		±2		%			
Resolution digital		0.1		°C			
Emissivity	0.1	0.97	1.0	ε			
Standard start-up time		200		ms			
Stabilization time	1			min			
Weight	485	H04: 3.19g, H08: 2.96g					
	UART	H04: 3.13g, H08: 2.90g					
Communication interface	UART TTL(3.3V), RS-485						
Baud rate(Fixed)	19200bps						
Relative humidity	95% Max. non-condensing						

\*: ±2% of reading or ±2°C whichever is greater.

Accuracy is only effective if the object is fully covered by the sensor's FOV and applicable to stable temperature conditions.

## Dimensions

unit: mm

## Pin Configuration

No.	DTP-UART	DTP-485
	1 2 3 4	1 2 3 4
1	GND	GND
2	RX	D+
3	TX	D-
4	3.3V	3.3V

## Accessories

	100mm length, four wire open cable	1 pc
--	------------------------------------	------

### Calculate Field of View

The FOV determines the size of the infrared measurement area according to the distance.

unit: mm

### Tutorial 1(Arduino UNO)

#### - Connection Diagram

- DTP-UART: [https://www.diwellshop.com/web/en/DTP/DTP-UART\\_Arduino.zip](https://www.diwellshop.com/web/en/DTP/DTP-UART_Arduino.zip)

Hardware: Arduino Uno, DTP-UART Sensor, 100Ω, 1.8kΩ, 3.3kΩ

Software : Arduino IDE

- DTP-485 : [https://www.diwellshop.com/web/en/DTP/DTP-485\\_Arduino.zip](https://www.diwellshop.com/web/en/DTP/DTP-485_Arduino.zip)

Hardware: Arduino Uno, DTP-485 Sensor, RS-485IC,

Software : Arduino IDE

#### - Expected Results.

### Protocol downloads

DTP-UART: [https://www.diwellshop.com/web/en/DTP/DTP-UART\\_protocol\\_EN.pdf](https://www.diwellshop.com/web/en/DTP/DTP-UART_protocol_EN.pdf)

DTP-485: [https://www.diwellshop.com/web/en/DTP/DTP-485\\_protocol\\_EN.pdf](https://www.diwellshop.com/web/en/DTP/DTP-485_protocol_EN.pdf)

### Object Temperature To, Ambient Temperature: Ta

To is the object temperature derived from thermopile and ambient sensor outputs.  
Ta stands for ambient temperature.

0x016D(hex) = 365(dec) → means 36.5°C

0xFFFF(hex) → 0x000F(two's complement)=15 → means -1.5°C

- Output Data Limit

Ta: 0xFFE83(-38.1°C) ... 0x4E2(120.0°C)

To: 0xFE70(~40.0°C) ... 0xED8(380.0°C)

### Emissivity Correction

The DTP is calibrated for an object emissivity of 0.97. It can be easily customized by the customer for any other emissivity in the range 0.1...1.0. Refer to the protocol pdf to adjust emissivity.

### Products handling precaution

- ※ When it comes to dust removal by air, the best method is to use a blower, and to avoid using compressed air.
- ※ Do not press the lens with your hands or any other object.
- ※ Do not scratch the lens surface with sharp objects.
- ※ Voluntary disassembly and modification of the product is prohibited.
- ※ Avoid direct sunlight, chemical substance, heat or fire.
- ※ Water resistance is not guaranteed.

### Tutorial 2(Raspberry pi 2)

#### - Connection Diagram

- DTP-UART: [https://www.diwellshop.com/web/en/DTP-UART\\_Raspberry.zip](https://www.diwellshop.com/web/en/DTP-UART_Raspberry.zip)

Hardware: Raspberry Pi 2, DTP-UART Sensor.

Software : wiringPi library

#### - Connection Diagram

- DTP-485: [https://www.diwellshop.com/web/en/DTP-485\\_Raspberry.zip](https://www.diwellshop.com/web/en/DTP-485_Raspberry.zip)

Hardware: Raspberry Pi 2, DTP-485 Sensor. RS-485 transceiver(3.3V operating)

Software : wiringPi library

#### - Expected Results.

1 - Object: 33.2	Ambient: 26.0
2 - Object: 33.2	Ambient: 26.1
3 - Object: 33.2	Ambient: 26.0
4 - Object: 33.2	Ambient: 26.0
5 - Object: 33.3	Ambient: 26.1
6 - Object: 33.2	Ambient: 26.1
7 - Object: 33.4	Ambient: 26.1
8 - Object: 33.1	Ambient: 26.1
9 - Object: 33.4	Ambient: 26.1
10 - Object: 33.2	Ambient: 26.1
11 - Object: 33.1	Ambient: 26.0
