Description

The T-2500E PTFS is designed with cost, performance and easy maintenance as essential design concepts. The system provides an economical alternative to the full-featured model T-2500SE.

Features

- Temperature range of -80 to + 225C
- Quick temperature response time: +125C to -55C in 10 seconds.
- Economical, easily adjusted arm.
- Color touch-screen operator interface.
- Programmable temperature cycling.
- Sophisticated system self-diagnostics.
