

SUPERSTAR CNC

QUOTATION CNC ROUTER CX-1325

SPECIFICATION

CX1325CNC ROUTER

FEATURES

- 1.The whole machine body is made from steel seamless welding tempering aging treatment, rigid, no deformation.
- 2.Stepper motor and driver, high precision and high speed.
3. Taiwan 20 square rail guide, smooth operation, high precision, long life.
4. HQD air cooling spindle, long power life, high speed, carved smooth surface.
5. Large equipped with a separate cabinet, split keyboard operation, split keyboard operation, simple and convenient, easy to learn.
6. With vacuum system, dust collector,vacuum system can be sucked in the processing process of wood chips and debris, to keep the table clean and indirect maintenance of the equipment.

APPLICATION

Suitable for carpentry, wooden doors, furniture, cabinets, molds, etc.

Material suitable: Wood sheet, MDF, hard wood, acrylic sheet, PVC foam sheet, PCB sheet,ABS double color sheet, aluminum, brass, gold, silver, etc.

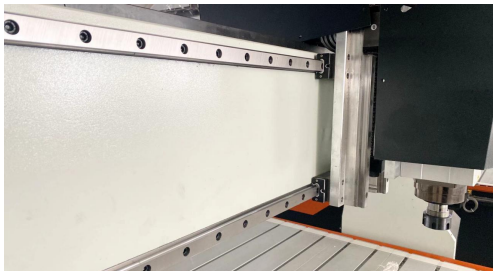

Engraving Working include cutting, 2D engraving, 3D engraving, hollowing, etc.

TECHNICAL PARAMETER

X Working Area	1300mm
Y Working Area	2500mm
Z Working Area	200mm
Table structure	Vacuum adsorption table
Command code	G code
XYZ Axis structure	X/Y Rack rail; Z Screw rail
Input Power	18KW
Power	AC380V / 60HZ
Spindle	HQD 7.5KW air cooling spindle
Spindle rotation speed	18000rpm / min
Inverter	11KW DELTA INVETER
Drive motor	LEADSHINEdriver ,450B step motor
Operating system	ORIGIONAL NC STUDIO
Vacuum pump	7.5KW Air pump
Linear rail	Taiwan 20
Net Weight	900KGS

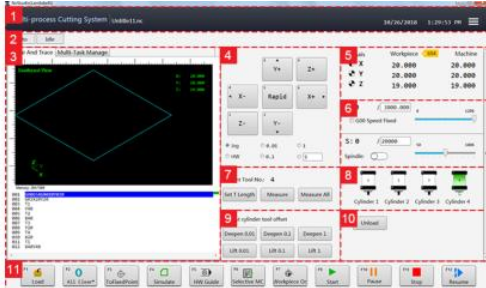

JINAN JINSHENGXING MACHINERY MANUFACTURER CO., LTD

ADD: G308 ROAD, DAQIAO TOWN, TIANQIAO DIST., JINAN CITY, SHANDONG PROVINCE, CHINA.

Spindle	7.5KW Air cooling Brand name :HQD Spindle cooling: Air cooled  It's long power life, speed up to 18000 rpm / min, carved smooth surface.	
Drive Motor	LEADSHINEdriver Stepper motor 450B High performance Adjustable driver current rang from 0.5A/phase to 8A/phase Single power input,voltage range from AC60V-130V The up-most pulse response frequency amounts to200Kpps Protection of over voltage,overheat and over-current.	 
Rack rail	XY Axis 20 Square rail Taiwan 20 square rail guide, smooth operation, high precision, long life. Limit Switch The limit switch is used to control the travel and limit protection of mechanical equipment to prevent engraving failure caused by exceeding the processing range during engraving.	 

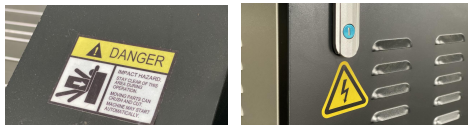

JINAN JINSHENGXING MACHINERY MANUFACTURER CO., LTD

ADD: G308 ROAD, DAQIAO TOWN, TIANQIAO DIST., JINAN CITY, SHANDONG PROVINCE, CHINA.

Screw	Z Axis ball screw Z-axis ball screw structure, the machine head runs stably and powerfully, and the spindle will not drop when the power off.	
Inverter	11KW It can realize the functions of tension control, automatic voltage stabilization and overload protection	
System	NC STUDIO(ORIGIONAL) It is a CNC system solution for Weihong's multi-process cutng machine in woodworking industry. With simple and convenient operation and customized functions, the system can match with different machine models.According to the operational role and usage scenarios, the system interface	
Lubrication	AUTO Oil filling It can provide lubrication for the equipment, which is conducive to the smooth operation of machinery.	
Dust collector	Power: 3KW It can avoid the pollution of woodworking engraving machine, and it is also conducive to the maintenance and maintenance work at ordinary times, prolong the service life of engraving machine, and avoid physical injury to operators.	

JINAN JINSHENGXING MACHINERY MANUFACTURER CO., LTD

ADD: G308 ROAD, DAQIAO TOWN, TIANQIAO DIST., JINAN CITY, SHANDONG PROVINCE, CHINA.

Electrical part	Switch and parts This ensures all cables and pipes contained in the cable cover are protected from damage.	
Table	Vacuum adsorption table The vacuum adsorption table is connected with a vacuum pump through pipelines. There are many adsorption holes on the carving machine table surface. The negative pressure generated by the vacuum pump is firmly absorbed on the table surface by the vacuum pump. It has high efficiency and fast speed, and is suitable for carving wood doors and panel furniture.	
Vacuum Pump	Air Pump:7.5KW The vacuum pump is a special device for woodworking adsorption, it is convenient for the adsorption and fixation of the plate in the process of processing, and improves the processing efficiency.	
Control cabinet	New design, easy to move and save space. Folding cabinet, computer display screen easy to place, save space.	
Safety signs		
Accessories	Tools 2-4 pcs Wrench Clamp plates Users Manual

DELIVERY

COMPANY INTRODUCTION

JINAN JINSHENGXING ,brand name SUPERSTAR CNC is the leading CNC Router designer, manufacturer and exporter since 2003.

Over 400 professional staffs,72,000 square meters factory.

Overseas warehouses and distributors in more than 12 countries, Pakistan, Dubai, Thailand, Vietnam, South Africa,Turkey,Iraq,Poland, Morocco,America,etc

Our main products including: CNC Router, CNC Styrofoam Router,Stone Router, Metal cutting machine , Fiber laser machine, Plasma machine, Oscillating knife cutting machine, Hot wire Foam cutting machine, Glass cutting machine, Mask Machine.

All our machines pass CE Certificate.The OEM and ODM are available.

Welcome more cooperators with Superstar in the future,we are committed to build platforms in the CNC professional industry.
