

Cooling Jacket

Cooling Jacket assures cool condition for workers in hot work shop.

- Prevents stress caused by work in hot places.
- Save productive cost.

If connect compressed air(7 bar) line to the cooler, temperature of cool air is lower 15 ~ 17°C compared with inlet temperature, namely, difference between inlet and cool air outlet is 15 ~ 17°C approximately and supply the cool air to the vest .

This cooling jacket is useful for workers working in hot work shop and the workers can work with cool condition.

***** Attention : Clean compressed air must be supplied to the cooler *****

- * Weight : 300g
- * Adjustment of temperature :
 1. If turn the controller dial to clockwise
 - 1) temperature : higher
 - 2) wind flow : higher
 2. If turn the controller dial to counterclockwise
 - 1) temperature : lower
 - 2) wind flow : lower

***** Attention : Clean compressed air must be supplied to the cooler *****

CL-1 / Cooler

- * Weight : 430g
- * Adjustment of temperature
 - Temperature can be adjusted if turn the controller lever to arrow signal of warm and cool.

***** Attention : Clean compressed air must be supplied to the cooler *****

CL-2 / Cooler and Heater

Cooling Jacket

CJ-5
PVC
sheet

CJ-12
